What lies past The Fence? Why do dwelling issues wither and die at the different side? When Janey-Ann The City Beyond The Gates comes to a decision to discover out, she enters a wierd global the place nature has been changed by way of equipment and The City Beyond The Gates everybody is below the attention of the omnipotent Kemarch - an international the place she needs to possibility unknown hazard while she encourages the fairway Boy to flee along with her again to the land of the Trees...

the town past The Gates is written by means of N. Roy Clifton, and think it or not, my grandparents really knew him! He lived now not faraway from them and my nice uncle (my grandma's brother) used to be really pals along with his daughter, Janey, and from time to time, whilst my mother was once little, The City Beyond The Gates she visited Mr. Clifton and Janey. only a enjoyable truth ;) As for the book, it was once interesting. it is a few little woman named Janey-Ann. She lives at a farm along with her uncle. whilst the tale begins, it is her birthday. She gets her presents, then makes a decision to head for a walk. She finally ends up strolling to a fence. while she seems via it, she sees an entire varied world, and being a curious little girl, The City Beyond The Gates she desires to get through. She needs and a gate looks sooner than her. She walks via it, but if she appears back, the gate is gone! In my opinion, although it used to be written within the 70s, the distinction among one facet of the gate and the opposite is resembling lifestyles again within the the 50s and what existence should be like in many years with the controlling govt and the factitious meals and simply the way in which humans act, now not understanding who is in charge, yet nonetheless following the rules. It exhibits simply how blind everyone is to what's happening round them and the way machines can corrupt your life and good being.
